

**Greenidge President Dale Irwin, April 25, 2022:**

Our few remaining opponents have offered zero factual or legal basis for a denial of our permit renewal, but they did run a statewide digital campaign to generate thousands of pre-packaged submissions, which the researchers here admitted. We didn't need to employ campaign-style tactics; our community support is indisputable, as the record reflects. The IBEW strongly supports renewal. Yates County Legislature voted 13-0 in favor of renewal. The local Farm Bureau, which represents hundreds of family farms who live near our operation, voted unanimously for renewal. The Town of Torrey voted to support Greenidge's operations. To those who know Greenidge best, those people who actually live near our facility, the call is clear; the permit should be renewed.
